EW_L2_S11 Eastern Weddings are not space intensive...meaning a lot of different rooms. However, the spaces they use will need to be LARGE. They typically require a large space for the ceremony, which can often have up to 400 attendees. And, they will want an additional space for the luncheon/reception that follows. They also expect to use the foyer and promenade as part of the functions. Hotels need to be aware of all of the event functions. This can often include two dinners, breakfast daily and the luncheon/reception. Hotels will need to make sure that they have enough LARGE spaces to host each of these events.
